

# Take the high road to ensure underground safety.

# Excavations often cost more and take longer than needed.

## What if you could change that with one call?

Untrained crews, shutdowns due to non-compliance, improper planning and the wrong equipment can drive up costs and risk before your excavation project even starts. We can help you navigate these challenges and keep your team, budget and timeline safe.

As North America's largest supplier of trench safety systems and safety training, United Rentals is your single source for all your underground needs, including:

- The largest inventory of road plates and trench shoring rental equipment in the industry
- The newest technologies for superior protection and productivity
- Professional engineers for site-specific plans
- Ground Disturbance Competent Person Training, Confined Space Entry, Excavation and Trenching and Fall Protection Comprehensive/Essential Training

How you choose to manage your excavation project can make all the difference in terms of safety, time and money. Before you start, make one stop to get everything you need to stay on track.

# Customized solutions for all your trench safety needs.

United Rentals offers the largest fleet of shoring and underground excavation rental equipment in North America. In addition to providing trench supplies and trench safety solutions, United Rentals is a leader in safety training and certification.

## Avoid Costly Downtime

Stay compliant with trench experts who understand local and provincial regulatory requirements related to safety, shoring and more.

## Largest Supplier of Trench Equipment

Select from a vast fleet of excavation equipment for your project, including:

- Trench Shielding and Shoring
- Slide Rail Systems
- Engineered Solutions
- Confined Space Safety Equipment
- Bedding Containers
- Road/Crossing Plates

## Innovative

United Rentals' innovative products and techniques can increase productivity with:

- Less time in the trench
- Less overall time on the job
- More linear footage covered each day

## Onsite Training

Keep workers safe with training and certification from an industry leader. Classes include Excavation and Trenching Safety, Confined Space Entry, and more.

## Shoring, Shielding and Confined Space Equipment

4 Gas Monitor

Pipe Plugs

Confined Space Ventilation

Mega Brace

Steel Sheeting and Bracing

Steel Trench Shielding

Slide Rail Systems

Modular Aluminum Panels (MAPs)

Confined Space Entry and Rescue System

# Training and Certifications

Working the right way means working the safe way. We can help. United Rentals Trench Safety offers courses for workers in excavation and trenching as well as confined space entry. Some courses can even be tailored to meet your specific needs. Contact us to discuss setting up a class specifically for your business.

**Location:** United Rentals branch locations and select cities across Canada.

**Training Dates:** Visit us online for training class schedules.

**Training Details:** Each student receives an instructional workbook, a wallet card, and a certificate of completion. Lunch is provided.

Details may vary depending on the course taken.

# Confined Space Entry Training

Confined Space Entry Training is available for all workers who may enter, supervise entry to or be adversely affected by confined spaces. Our training course is designed to help workers identify any potential hazards associated with a confined space.

The course also addresses new provincial regulations and requirements including the duties and responsibilities for an Entrant, Attendant, Tending Worker, Qualified/Competent Person/Competent Supervisor and Rescue Personnel.

**Training topics**

- Permit requirements for confined space
- Proper ventilation of confined space
- Alternate entry procedures
- Use of gas monitoring equipment
- Duties of the employer, qualified/competent person and attendant
- Hazard identification and risk assessment

# Ground Disturbance Excavation and Trenching CPT

Qualified/Competent Person/Supervisor Review is designed for all employees involved in trenching work, including job foremen, job superintendents, engineers and any personnel involved in underground projects.

According to Provincial Legislation, every excavation must have a designated Qualified/Competent Person to manage the safety aspects of the site. To properly carry out Qualified/Competent Person responsibilities, this individual must have training in, and be knowledgeable of, soil analysis, the use of protective systems and the requirements of the regulation.

Additional responsibilities include identifying existing and predictable hazards in the work environment and eliminating or controlling those hazards.

**Training topics**

- Introduction to trench safety
- Sloping, benching, shoring and shielding guidelines
- Soil analysis
- Provincial OHS Legislation
- Protective systems options
- Job planning
- Qualified/Competent Person responsibilities

# The best people, equipment and solutions in the industry.

Whatever your projects demand, you can depend on United Rentals from start to finish. Count on the world's largest fleet of rental equipment, 24/7 service and support, over 900 locations across the U.S. and Canada, and experts ready to help you find the best solutions. When you need to get the job done, we're here to help.
