

FieldTurf Products

FieldTurf Revolution

FieldTurf Revolution is a high-end monofilament product with FIFA-approved certifications. It is highly resilient and is the longest lasting, most durable monofilament fiber on the market (see the Penn State Fiber Wear test). It also contains the heaviest, patented infill system, providing the best in safety and shock absorption for players.

FieldTurf Classic HD

FieldTurf Classic HD is a high end slit film product and a pioneer turf system in the industry. It provides the highest level of durability with uniquely designed fibers that resist wear and encapsulate infill for a longer lasting field. It also contains the heaviest, patented infill system, providing better safety and shock absorption for players.

FieldTurf XM6

FieldTurf XM6 a reliable, valuable monofilament turf system for clients whose priority is ball roll playability and grass-like aesthetics. It contains a thick layer of infill to provide players with the traction and shock absorption they need to perform.

FieldTurf XT

FieldTurf XT a valuable slit-film turf system for clients whose priority is having a multisport field which will be heavily used. It contains a thick layer of infill to provide players with the traction and shock absorption they need to perform.
